E. Wegmann Neuchatel
J. Tuzo Wilson, Toronto, Ont.

ELSEVIER PUBLISHING COMPANY - AMSTERDAM

GENERAL INFORMATION

Types of contribution

(a) Reviews
(b) Original research work not previously published in a generally accessible language in other periodicals
(c) Short communications
(d) Book reviews
(e) Announcements; Congress and symposium reports; News.

Notice to contributors

Papers will be published in English, French, or German. Every contribution in groups (a), (b) and (c) above should begin with an abstract of 50–200 words in English and als an explanation in English of the illustration belonging to the paper.

Manuscripts should preferably be presented in triplicate; they must be typewritten and double spaced. On the front page the title of the contribution should be followed by the name and complete address of the author. Be generous with space: leave good margins on both left and right side of each page. The paper should preferably be subdivided, each subdivision having a short heading. Illustrations and tables should be supplied separately, and not attached to manuscript pages. Illustrations should not be folded. The figures should be in a form suitable for reproduction, drawn in India ink on drawing or tracing paper, with lettering etc. in thin pencil. Photographs should be submitted as clear black and white prints on glossy paper. Half-tones already printed in an existing book, pamphlet, etc. are, in general, not acceptable. All illustrations should preferably be of such a size that the same reduction factor can be applied to all of them. All illustrations and tables should have a legend or title, making the material complete and understandable. These legends should be typed on a separate page.

All references should be given at the end of the paper. They should be alphabetically arranged; the initials of the authors should follow their surname. References should include author, year and title of the publication, periodical, volume number, first and last pages; for books, please give publisher and place of publication; for multi-author books and printed symposia please also give the names of the Editors. Every reference in the text should appear in the list of references, and vice versa. References in the text should be given by the name of the author and the year of publication.

For detailed author's instructions see Vol. 11(1): 71–78.

Submission of manuscript

Three copies should be submitted to the Editorial Office Tectonophysics, P.O. Box 1345, Amsterdam-C (The Netherlands). Illustrations should also be submitted in triplicate; one set should be in a form ready for reproduction, the other two may be of lower quality.

Publication, Subscription, Advertisements

Tectonophysics will have six issues to the volume.

Subscription price Dfl. 67.50 per volume + postage. Additional charges for copies by air mail available on request. All subscriptions should be sent to Elsevier Publishing Company, P.O. Box 211, Amsterdam (The Netherlands).

For advertising rates apply to the publishers.

Tectonophysics, Volumes 1–10

Agterberg, F.P. (Ottawa, Ont., Canada)
Statistical techniques for geological data *1*–233
Ahmad, F. (Aligarh, India)
Orogeny, geosyncline and continental drift *5*–177
Aki, K. (Cambridge, Mass.,U.S.A.)
Seismicity and seismological method *6*– 41
Ambraseys, N.N. (London, Great Britain)
Some characteristic features of the Anatolian fault zone *9*–143
Amoros, J.L. and San Miguel, A. (Carbondale, Ill., U.S.A.)
The pressure field and the internal constitution of the earth *5*–287
Antoine, J.W. and Pyle, T.E. (College Station, Texas, U.S.A.)
Crustal studies in the Gulf of Mexico *10*–477
Aronson, J.L. (Pasadena, Calif., U.S.A.)
Absolute ages of the plutonic and metamorphic rocks of New Zealand (abstract) . . *4*–499
Arsovsky, M. and Hadžievsky, D. (Skopje, Yugoslavia)
Correlation between neotectonics and the seismicity of Macedonia *9*–129
Augustithis, S.S. (Addis Ababa, Ethiopia)
On the phenomenology of plastic deformation of quartz and micas in some granites . *2*–455
Avias, J. (Montpellier, France)
Overthrust structure of the main ultrabasic New Caledonian massifs *4*–531

Bagin, V.I., Brodskaya, S.Yu., Jilyaeva, V.A., Petrova, G.N., Pechersky, D.M. and Shmidt, O.J. (Moscow, U.S.S.R.)
Magnetic characteristics of basalts and peridotites of rift zones *8*–437
Balakrishna, S. and Gowd, T.N. (Hyderabad, India)
Role of fluid pressure in the mechanics of transcurrent faulting at Koyna (India) . . *9*–301
Båth, M. (Uppsala, Sweden)
Seismology in the Upper Mantle Project *1*–261
Båth, M. (Uppsala, Sweden)
Lateral inhomogeneities of the upper mantle *2*–483
Bayly, M.B. (Troy, N.Y., U.S.A.)
Viscosity and anisotropy estimates from measurements on chevron folds *9*–459
Beloussov, V.V. (Moscow, U.S.S.R.)
Against the hypothesis of ocean-floor spreading *9*–489
Belyaevsky, N.A. (Moscow, U.S.S.R.)
The problem of relationship between geological structures and deep crustal structure (abstract) *7*–404
Belyaevsky, N.A. and Fedynsky, V.V. (Moscow, U.S.S.R.)
Deep drilling for crust investigations in the U.S.S.R. *1*–353
Ben-Menahem, A. (Rehovoth, Israel)
On the use of surface waves in earthquake mechanism studies (abstract) *4*–245
Berckhemer, H. (Frankfurt/Main, Germany)
Direct evidence for the composition of the lower crust and the Moho *8*– 97
Berckhemer, H. and Jacob, K.H. (Frankfurt/Main, Germany)
Synthetic seismic pulses from propagating faults (abstract) *4*–279
Bhaskara Rao, V., Satyanarayana Murty, B.V. and Satyanarayana Murty, A.V.S. (Waltair, India)
Some geological and geophysical aspects of the Koyna (India) earthquake, December 1967 . . . . . *7*–265
Bhattacharyya, D.S. (Kharagpur, India)
Orientation of mineral lineation along the flow direction in rocks *3*– 29
Bhattacharyya, D.S. (Kharagpur, India)
Orientation of mineral lineation along the flow direction in rocks: a reply *3*–563

Bhattacharyya, D.S. and Pasayat, S. (Kharagpur, India)
Deformation texture in quartz: a theoretical approach 5–303
Blake Jr., M.C., Irwin, W.P. and Coleman, R.G. (Menlo Park, Calif., U.S.A.)
Blueschists-facies metamorphism related to regional thrust faulting 8–237
Bogdanov, N.A. (Moscow, U.S.S.R.)
Paleozoic geosynclines of the western part of the circum-Pacific belt (abstract) . . 4–581
Bombolakis, E.G. (Boston, Mass., U.S.A.)
Photoelastic investigation of brittle crack growth within a field of uniaxial compression 1–343
Bombolakis, E.G. (Chestnut Hill, Mass., U.S.A.)
Photoelastic study of initial stages of brittle fracture in compression 6–461
Borg, I. (Livermore, Calif., U.S.A.) and Handin, J. (Ventura, Calif., U.S.A.)
Experimental deformation of crystalline rocks 3–249
Borisov, A.A. and Fedynsky, V.V. (Moscow, U.S.S.R.)
Geophysical characteristics of geosynclinal regions 1–121
Boulanger, Yu.D., Pevnev, A.K. and Enman, V.B. (Moscow, U.S.S.R.)
On variations of recent crustal movements on Garm and Nimichi polygons 9–103
Brace, W.F. (Cambridge, Mass., U.S.A.)
Current laboratory studies pertaining to earthquake prediction 6– 75
Branch, C.D. (Canberra, A.C.T., Australia)
Genesis of magma for acid calc-alkaline volcano-plutonic formations 4– 83
Breiner, S. and Kovach, R.L. (Stanford, Calif., U.S.A.)
Local magnetic events associated with displacement along the San Andreas fault (California) 6– 69
Brookfield, M.E. (Reading, Great Britain)
Eustatic changes of sea-level and orogeny in the Jurassic 9–347
Bukhnikashvili, A.V., Gugunava, G.E. and Kebuladze, V.V. (Tbilisi, U.S.S.R.)
Some results of a study of deep geological structure in the region of eastern Georgia by methods of long-period earth-current variations and magneto-telluric sounding . . 1–211
Bürgl, H. (Bogotá, Colombia)
The orogenesis in the Andean system of Colombia 4–429
Burns, K.L. (Sydney, N.S.W., Australia) and Spry, A.H. (Melbourne, Vic., Australia)
Analysis of the shape of deformed pebbles 7–177
Byerlee, J.D. (Menlo Park, Calif., U.S.A.)
The mechanics of stick-slip 9–475

Canitez, N. and Balamir Ücer, S. (Istanbul, Turkey)
Computer determinations for the fault-plane solutions in and near Anatolia . . . 4–235
Cann, J.R. (London, Great Britain)
Petrology of ocean floor rocks (abstract) 7–543
Carr, J.B. (Portsmouth, R.I., U.S.A.)
When did mantle convection cease? 6–413
Carson, W.P. (Stanford, Calif., U.S.A.)
Development of flow cleavage in the Martinsburg Shale, Port Jervis South area (northern New Jersey) 5–531
Chadwick, B. (Exeter, Great Britain)
Patterns of fracture and dyke intrusion near Frederikshåb, southwest Greenland . . 8–247
Challis, G.A. (Lower Hutt, New Zealand)
Discussion of the paper "The origin of ultramafic and ultrabasic rocks" by P.J. Wyllie 7–495
Chapple, W.M. (Providence, R.I., U.S.A.)
Fold shape and rheology: the folding of an isolated viscous-plastic layer 7– 97
Chinnery, M.A. (Providence, R.I., U.S.A.) and Petrak, J.A. (Vancouver, B.C., Canada)
The dislocation fault model with a variable discontinuity 5–513

Choukroune, P. (Montpellier, France)
Un exemple d'analyse microtectonique d'une série calcaire affectée de plis isopaques ("concentriques") (An example of mesoscopic analysis of concentric folding in limestone series) 7– 57
Christensen, N.I. (Seattle, Wash., U.S.A.)
Chemical changes associated with upper mantle structure 6–331
Christensen, N.I. and Crosson, R.S. (Seattle, Wash., U.S.A.)
Seismic anisotropy in the upper mantle 6– 93
Coleman, R.G. (Menlo Park, Calif., U.S.A.)
Glaucophane schists from California and New Caledonia 4–479
Cook, K.L. (Salt Lake City, Utah, U.S.A.)
Active rift system in the Basin and Range Province 8–469
Coward, M.P., Francis, P.W., Graham, R.H. and Watson, J. (London, Great Britain)
Large-scale Laxfordian structures of the Outer Hebrides in relation to those of the Scottish mainland 10–425
Creer, K.M. (Newcastle upon Tyne, Great Britain)
Some comments on Van Hilten's discussion on ancient continental configurations . 1–531
Cullen, D.J. (Wellington, New Zealand)
Island arc development in the southwest Pacific 4–163
Currie, K.L. and Ferguson, J. (Ottawa, Ont., Canada)
The mechanism of intrusion of lamprophyre dikes indicated by "offsetting" of dikes . 9–525

Davydova, N.I., Kosminskaya, I.P. and Michota, G.G. (Moscow, U.S.S.R.)
The thickness and nature of seismic discontinuities based on deep seismic sounding . 10–561
de Booy, T. (Amsterdam, The Netherlands)
Mobility of the earth's crust: a comparison between the present and the past . . . 6–177
de Marco, A. and Sestini, G. (Rome, Italy)
Rock thermal conductivity measured by a heat absorbing long cylindrical probe . . 10– 51
Demenitskaya, R.M. and Karasik, A.M. (Leningrad, U.S.S.R.)
The active rift system of the Arctic Ocean 8–345
Dennis, J.G. and Walker, C.T. (Long Beach, Calif., U.S.A.)
Earthquakes resulting from metastable phase transitions 2–401
Den Tex, E. (Leiden, The Netherlands)
Origin of ultramafic rocks, their tectonic setting and history: a contribution to the discussion of the paper "The origin of ultramafic and ultrabasic rocks" by P.J. Wyllie 7–457
Deuser, W.G. (Woods Hole, Mass.,U.S.A.)
Hypothesis of the formation of the Scotia and Caribbean Seas 10–391
Dewey, J.F. (Cambridge, Great Britain)
Nature and origin of kink-bands 1–459
Dewey, J.F. (Cambridge, Great Britain) and Bird, J.M. (Albany, N.Y., U.S.A.)
Plate tectonics and geosynclines 10–625
Dickinson, W.R. (Stanford, Calif., U.S.A.)
Tectonic development of Fiji 4–543
Dietz, R.S. (Washington, D.C., U.S.A.)
Earth's original crust - lost quest? 2–515
Doroginitskaja, L.M. and Moiseenko, U.I. (Novosibirsk, U.S.S.R.)
Thermal conductivity determination of terrigenous rocks by other physical parameters with polyfactory correlative analysis 10– 79
Drake, C.L. (Palisades, N.Y., U.S.A.) and Kosminskaya, I.P. (Moscow, U.S.S.R.)
The transition from continental to oceanic crust 7–363
Duda, S.J. (Uppsala, Sweden)
Secular seismic energy release in the circum-Pacific belt 2–409
Dunnet, D. (London, Great Britain)
A technique of finite strain analysis using elliptical particles 7–117

Eaton, J.P., Lee, W.H.K. and Pakiser, L.C. (Menlo Park, Calif., U.S.A.)
Use of microearthquakes in the study of the mechanics of earthquake generation along the San Andreas fault in central California *9*–259
Emmons, R.C. (Madison, Wisc., U.S.A.)
A tectonic view of the moon: part I *1*–541
Emmons, R.C. (Madison, Wisc., U.S.A.)
A tectonic view of the moon: part II. Craters *2*– 83
Emmons, R.C. (Madison, Wisc., U.S.A.)
Strike-slip rupture patterns in sand models *7*– 71
Engelen, G.B. (Amsterdam, The Netherlands)
A hypothesis on the origin of the Bermuda Rise *1*– 85
Ernst, W.G. (Los Angeles, Calif., U.S.A.) and Seki, Y. (Urawa, Japan)
Petrologic comparison of the Franciscan and Sanbagawa metamorphic terranes . . *4*–463
Evison, F.F. (Wellington, New Zealand)
Seismogenesis *9*–113

Fairbridge, R.W. (Palisades, N.Y., U.S.A.)
Polar migration, sea-floor spreading, atolls and climate change (abstract) *7*–545
Fedotov, S.A. (Moscow, U.S.S.R.)
Upper mantle properties of the southern part of the Kuril Island arc according to detailed seismological investigation data *2*–219
Fedotov, S.A., Dolbilkina, N.A., Morozov, V.N., Myachkin, V.I., Preobrazensky, V.B. and Sobolev, G.A. (Moscow, U.S.S.R.)
Investigation on earthquake prediction in Kamchatka *9*–249
Findlay, D.C. and Smith, C.H. (Ottawa, Ont., Canada)
Drilling for scientific purposes in Canada *2*–247
Fleming, C.A. (Lower Hutt, New Zealand)
Biogeographic change related to Mesozoic orogenic history in the southwest Pacific . *4*–419
Florensov, N.A. (Irkutsk, U.S.S.R.)
Rifts of the Baikal mountain region *8*–443
Förster, H. (Aachen, Deutschland)
Ein experimenteller Beitrag zur Deutung grosser Überschiebungen (Some experiments as a basis for discussing large overthrusts) *4*– 69
Fotiadi, E.E., Moiseenko, U.I., Sokolova, L.S. and Duchkov, A.D. (Novosibirsk, U.S.S.R.)
Geothermal investigations in some regions of western Siberia *10*– 95
Fox, P.J., Ruddiman, W.F., Ryan, W.B.F. and Heezen, B.C. (Palisades, N.Y., U.S.A.)
The geology of the Caribbean crust, I: Beata Ridge *10*–495

Garfunkel, Z. (Jerusalem, Israel)
Problems of wrench faults *3*–457
Garkalenko, I.A. (Kiev, U.S.S.R.)
The deep-seated crustal structure in the western part of the Black Sea and adjacent areas: seismic reflection measurement *10*–539
Gay, N.C. (London, Great Britain)
Orientation of mineral lineation along the flow direction in rocks: a discussion . . *3*–559
Gay, N.C. (Johannesburg, South Africa)
The motion of rigid particles embedded in a viscous fluid during pure shear deformation of the fluid *5*– 81
Gay, N.C. (Johannesburg, South Africa)
Pure shear and simple shear deformation of inhomogeneous viscous fluids. 1. Theory . *5*–211
Gay, N.C. (Johannesburg, South Africa)
Pure shear and simple shear deformation of inhomogeneous viscous fluids. 2. The determination of the total finite strain in a rock from objects such as deformed pebbles *5*–295

Gervasio, F.C. (Manila, Philippines)
Age and nature of orogenesis of the Philippines 4–379
Ghosh, S.K. (Uppsala, Sweden)
Experimental tests of buckling folds in relation to strain ellipsoid in simple shear deformations 3–169
Ghosh, S.K. (Uppsala, Sweden)
Experimental tests of buckling folds in relation to strain ellipsoid in simple shear deformations: a reply 5–343
Ghosh, S.K. (Uppsala, Sweden)
Experiments of buckling of multilayers which permit interlayer gliding 6–207
Ghosh, S.K. (Calcutta, India)
A theoretical study of intersecting fold patterns 9–559
Ghosh, S.K. and Ramberg, H. (Uppsala, Sweden)
Buckling experiments on intersecting fold patterns 5– 89
Ghosh, S.K. and Ramberg, H. (Uppsala, Sweden)
Deformation structures in the Hovin Group Schists in the Hommelvik-Hell region Norway: a reply 8–161
Gibson, I.L. (Addis Ababa, Ethiopia)
Crustal flexures and flood basalts 3–447
Gibson, I.L. (Addis Ababa, Ethiopia)
The structure and volcanic geology of an axial portion of the Main Ethiopian Rift . 8–561
Girdler, R.W. (Newcastle upon Tyne, Great Britain)
The structure and evolution of the Red Sea and the nature of the Red Sea, Gulf of Aden and Ethiopian Rift junction 10–579
Glikson, A.Y. (Canberra, A.C.T., Australia)
Geosynclinal e volution and geochemical affinities of Early Precambrian systems . . 9–397
Gnibidenko, H.S. (Novo-Alexandrovsk, Sakhalin, U.S.S.R.)
On the basement of the northwest sector of the Pacific Belt 9–513
Gnibidenko, H.S. (Novo-Alexandrovsk, Sakhalin, U.S.S.R.) and Shashkin, K.S. (Vladivostok, U.S.S.R.)
Basic principles of the geosynclinal theory 9– 5
Goguel, J. (Paris, France)
Le programme de travail en tectonique dans le Projet du Manteau Superieur (The work programme in tectonics in the Upper Mantle Project) 1–257
Goguel, J. (Paris, France)
Une estimation de l'énergie mécanique disponible dans la contraction par refroidissement (An estimation of the mechanical energy available in contraction by cooling) . 2–395
Gorshkov, G.S. (Petropavlovsk, Kamchatka, U.S.S.R.)
Intraoceanic islands, East Pacific Ridge, island arcs: volcanism and upper mantle . . 8–213
Green, D.H. (Canberra, A.C.T., Australia)
The origin of basaltic and nephelinitic magmas in the earth's mantle 7–409
Gregor, C.B. (Beirut, Lebanon) and Zijderveld, J.D.A. (Utrecht, The Netherlands)
Paleomagnetism and the Alpine tectonics of Eurasia. 1. The magnetism of some Permian red sandstones from northwestern Turkey 1–289
Gupta, M.L., Verma, R.K., Hamza, V.M., Venkateshwar Rao, G. and Rao, R.U.M. (Hyderabad, India)
Terrestrial heat flow and tectonics of the Cambay Basin, Gujarat State (India) . . . 10–147
Gzovsky, M.V. (Moscow, U.S.S.R.)
Tectonophysics and the study of the upper mantle 1–365

Hamilton, W. (Denver, Colo., U.S.A.)
Tectonics of Antarctica 4–555
Hamilton, W. (Denver, Colo., U.S.A.)
Continental drift in eastern Asia and Alaska (abstract) 4–569

Harris, P.G. (Leeds, Great Britain)
Basalt type and African rift valley tectonism *8*–427
Hasebe, K., Fuji, N. and Uyeda, S. (Tokyo, Japan)
Thermal processes under island arcs *10*–335
Hast, N. (Stockholm, Sweden)
The state of stress in the upper part of the earth's crust *8*–169
Havemann, H. (Berlin, Deutschland)
Kontinentverschiebung mit oder ohne Polwanderung (Continental drift with or without polar wandering) *2*–259
Havemann, H. (Borgsdorf/Berlin, Germany)
Irregular crustal but regular mantle movements *3*–523
Healy, J.H., Hamilton, R.M. and Raleigh, C.B. (Menlo Park, Calif., U.S.A.)
Earthquakes induced by fluid injection and explosion *9*–205
Heezen, B.C. (Palisades, N.Y., U.S.A.)
Tectonic fabric of the ocean floor (abstract) *7*–546
Heezen, B.C. (Palisades, N.Y., U.S.A.)
The World Rift System: an introduction to the symposium *8*–269
Hentinger, R. (Orléans-la-Source, France) et Jolivet, J. (Paris, France)
Nouvelles déterminations du flux géothermique en France (New determinations of the geothermal flow in France) *10*–127
Hernes, I. (Bergen, Norway)
Continental drift and orogenesis *5*–151
Hiersemann, L. (Halle/Saale, D.D.R.)
Rezente vertikale Erdkrustenbewegungen in Europa (Recent vertical crustal movements in Europe) *4*–261
Hiersemann, L. (Halle/Saale, G.D.R.)
Bibliography of recent crustal movements in Europe *4*–283
Ho, C.S. (Taipeh, Taiwan, Republic of China)
Structural evolution of Taiwan *4*–367
Hobbs, B.E. (Canberra, A.C.T., Australia)
Recrystallization of single crystals of quartz *6*–353
Holland, J.G. (Durham, Great Britain) and Lambert, R.St.J. (Oxford, Great Britain)
Structural regimes and metamorphic facies *7*–197
Hopgood, A.M. (St. Andrews, Great Britain)
Theoretical consideration of the mechanics of tectonic reorientation of dykes (with particular reference to Lewisian dykes of the Isle of Barra) *3*– 17
Horwitz, R.C. (Perth, W.A., Australia)
Pangaea and some units in the Precambrian and the Palaeozoic *4*– 5
Hospers, J. and van Andel, S.I. (Amsterdam, The Netherlands)
Palaeomagnetism and the hypothesis of an expanding earth *5*– 5
Hospers, J. and van Andel, S.I. (Amsterdam, The Netherlands)
Palaeomagnetic data from Europe and northern America and their bearing on the origin of the North Atlantic Ocean *6*–475
Hossack, J.R. (Edinburgh, Great Britain)
Pebble deformation and thrusting in the Bygdin area (southern Norway) *5*–315
Hurtig, E. (Leipzig, D.D.R.)
Zur Deutung geophysikalischer Untersuchungsergebnisse über den Bau der sialischen Erdkruste (A concept for interpreting the geophysical structure of the sialic crust) . *7*–159
Hurtig, E. und Brugger, H. (Leipzig, D.D.R.)
Wärmeleitfähigkeitsmessungen unter einaxialem Druck (Heat conductivity measurements under uniaxial pressure) *10*– 67

Illies, J.H. (Karlsruhe, Deutschland)
Kontinentaldrift - mit oder ohne Konvektionsströmungen? (Continental drift - with or without convection currents? *2*–521

Illies, J.H. (Karlsruhe, Germany)
An intercontinental belt of the world rift system *8*– 5
Ingram S.J., R.E. (Dublin, Ireland)
Computer work and mechanism studies *4*–225

Jackson, E.D. (Menlo Park, Calif., U.S.A.)
Discussion on the paper "The origin of ultramafic and ultrabasic rocks" by P.J. Wyllie (abstract) *7*–517
Jakeš, P. (Prague, Czechoslovakia) and White, A.J.R. (Canberra, A.C.T., Australia)
Structure of the Melanesian arcs and correlation with distribution of magma types. . *8*–223
Jessop, A.M. (Ottawa, Ont., Canada)
The effect of environment on divided bar measurements *10*– 39
Johnson, A.M. (Stanford, Calif.,U.S.A.)
Development of folds within Carmel Formation, Arches National Monument, Utah . *8*– 31
Johnson, M.R.W. (Edinburgh, Great Britain)
A re-interpretation of the mechanics of the Ben Sgriol fold, Loch Hourn (northwest Scotland): a discussion *5*– 57
Johnson, M.R.W. (Edinburgh, Great Britain)
A re-interpretation of the mechanics of the Ben Sgriol fold, Loch Hourn (northwest Scotland): reply to Professor J.G. Ramsay *5*– 67

Kanamori, H. (Tokyo, Japan)
Recent developments in earthquake prediction research in Japan *9*–291
Kanasewich, E.R., Clowes, R.M. and McCloughan, C.H. (Edmonton, Alta., Canada)
A buried Precambrian rift in western Canada *8*–513
Katili, J.A. (Bandung, Indonesia)
Structure and age of the Indonesian tin belt with special reference to Bangka . . . *4*–403
Kawano, Y. and Ueda, Y. (Sendai, Japan)
Periods of the igneous activities of the granitic rocks in Japan by K–Ar dating method *4*–523
Khitarov, N.I. (Moscow, U.S.S.R.)
Questions dealing with concepts of the transition zone of the upper mantle to the earth's crust, as indicated by some experimental data *1*–175
Knopoff, L. (Los Angeles, Calif., U.S.A.)
Structure of the low velocity channel and its relationship to large-scale tectonics (abstract) *7*–403
Knopoff, L., Schlue, J.W. and Schwab, F.A. (Los Angeles, Calif., U.S.A.)
Phase velocities of Rayleigh waves across the East Pacific Rise *10*–321
Korkman, K. (Uppsala, Sweden)
Aftershock P–wave spectra and dynamic features of the Aleutian Islands earthquake sequence of February 4, 1965 . . . . . *5*–245
Kozyrev, N.A. (Pulkovo, U.S.S.R.)
Volcanism on the planets *1*–451
Krasny, L.I. (Leningrad, U.S.S.R.)
Structure and geologic history of the northwestern Pacific mobile belt *4*–339
Krestnikov, V.N. and Nersesov, I.L. (Moscow, U.S.S.R.)
Relation of the deep structure of the Pamirs and Tien Shan to their tectonics . . . *1*–183
Kuenen, Ph.H. (Groningen, The Netherlands)
Origin of ptygmatic features *6*–143
Kuno, H. (Tokyo, Japan)
Origin of basaltic magmas and of ultramafic rocks: summary and conclusion . . . *7*–521

Elsevier/North-Holland Journals in the Geo-Sciences

AGRICULTURAL METEOROLOGY **1972: Volumes 9 & 10**

An International Journal

6 issues per volume. Subscription price:
Dfl. 164.50 plus Dfl. 10.50 postage and handling for two volumes. (Approx. US$ 47.00 plus US$ 3.00)

CHEMICAL GEOLOGY **1972: Volumes 9 & 10**

An International Journal

4 issues per volume. Subscription price:
Dfl. 143.50 plus Dfl. 10.50 postage and handling for two volumes. (Approx. US$ 41.00 plus US$ 3.00)

EARTH AND PLANETARY SCIENCE LETTERS **1972: Volumes 12 & 13**

A Journal Devoted to the Development in Time of the Earth and Planetary System

6 issues per volume. Subscription price:
Dfl. 140.00 plus Dfl. 14.00 postage and handling for two volumes. (Approx. US$ 40.00 plus US$ 4.00)

EARTH-SCIENCE REVIEWS **1972: Volume 8**

International Magazine for Geo-Scientists Including News Supplement

4 issues per volume. Subscription price:
Dfl. 73.50 plus Dfl. 7.00 postage and handling.
(Approx. US$ 21.00 plus US$ 2.00)
Personal subscription rate: Dfl. 35.00 including postage and handling. (Approx. US$ 10.00)

ENGINEERING GEOLOGY **1972: Volume 6**

An International Journal

4 issues per volume. Subscription price:
Dfl. 73.50 plus Dfl. 7.00 postage and handling.
(Approx. US$ 21.00 plus US$ 2.00)

GEODERMA **1972: Volumes 7-9**

An International Journal of Soil Science

4 issues per volume. Subscription price:
Dfl. 189.00 plus Dfl. 14.00 postage and handling for three volumes. (Approx. US$ 54.00 plus US$ 4.00)

GEOEXPLORATION **1972: Volume 10**

An International Journal of Mining & Technical Geophysics and Related Subjects

4 issues per volume. Subscription price:
Dfl. 45.50 plus Dfl. 7.00 postage and handling.
(Approx. US$ 13.00 plus US$ 2.00)

JOURNAL OF HYDROLOGY **1972: Volumes 16 & 17**

An International Journal Covering All Aspects of Scientific Hydrology

6 issues per volume. Subscription price:
Dfl. 140.00 plus Dfl. 14.00 postage and handling for two volumes. (Approx. US$ 40.00 plus US$ 4.00)

MARINE CHEMISTRY **1972: Volume 1**

An International Journal for Studies of All Chemical Aspects of the Marine Environment

4 issues per volume. Subscription price:
Dfl. 87.50 plus Dfl. 7.00 postage and handling.
(Approx. US$ 25.00 plus US$2.00)
Personal subscription rate: Dfl. 45.50 including postage and handling. (Approx. US$ 13.00)

MARINE GEOLOGY **1972: Volumes 12 & 13**

International Journal of Marine Geology, Geochemistry and Geophysics

5 issues per volume. Subscription price:
Dfl. 143.50 plus Dfl. 17.50 postage and handling for two volumes. (Approx. US$ 41.00 plus US$ 5.00)
Personal subscription rate: Dfl. 52.50 including postage and handling. (Approx. US$ 15.00)

REVIEW OF PALAEOBOTANY AND PALYNOLOGY **1972: Volumes 13 & 14**

An International Journal

4 issues per volume. Subscription price:
Dfl. 143.50 plus Dfl. 10.50 postage and handling for two volumes. (Approx. US$ 41.00 plus US$ 3.00)

PALAEOGEOGRAPHY, PALAEOCLIMATOLOGY, PALAEOECOLOGY **1972: Volumes 11 & 12**

An International Journal for the Geo-Sciences

4 issues per volume. Subscription price:
Dfl. 147.00 plus Dfl. 10.50 postage and handling for two volumes. (Approx. US$ 42.00 plus US$ 3.00)
Personal subscription rate: Dfl. 52.50 including postage and handling. (Approx. US$ 15.00)

PHOTOGRAMMETRIA **1972: Volume 28**

Official Journal of the International Society for Photogrammetry

6 issues per volume. Subscription price:
Dfl. 42.00 plus Dfl. 7.00 postage and handling.
(Approx. US$ 12.00 plus US$ 2.00)

PHYSICS OF THE EARTH AND PLANETARY INTERIORS **1972: Volume 5**

An International Journal of Geophysics of the Solid Earth

4 issues per volume. Subscription price:
Dfl. 91.00 plus Dfl. 7.00 postage and handling.
(Approx. US$ 26.00 plus US$ 2.00)

SEDIMENTARY GEOLOGY **1972: Volumes 7 & 8**

International Journal of Applied and Regional Sedimentology

4 issues per volume. Subscription price:
Dfl. 126.00 plus Dfl. 10.50 postage and handling for two volumes. (Approx. US$ 36.00 plus US$ 3.00)

SEDIMENTOLOGY **1972: Volumes 18 & 19**

Journal of the International Association of Sedimentologists

4 issues per volume. Subscription price:
Dfl. 112.00 plus Dfl. 10.50 postage and handling for two volumes. (Approx. US$ 32.00 plus US$ 3.00)

TECTONOPHYSICS **1972: Volumes 13-15**

International Journal of Geotectonics and the Geology and Physics of the Interior of the Earth

4 issues per volume. Subscription price:
Dfl. 168.00 plus Dfl. 14.00 postage and handling for three volumes. (About US$ 48.00 plus US$ 4.00)

ELSEVIER/NORTH-HOLLAND PUBLISHING COMPANY
JOURNAL DIVISION
P.O. BOX 211 - AMSTERDAM - THE NETHERLANDS

DEVELOPMENTS IN SOLID EARTH GEOPHYSICS

1 - THE EARTH'S CRUST AND MANTLE

by **F. A. Vening Meinesz**

Contents: Introduction and summary. Constitution of the earth, isostasy, equilibrium, thermal behaviour. Crustal phenomena and deformations. Convection currents in the mantle. The pattern of mantle currents, of deep ocean trenches and of volcanoes over the earth's surface.

x + 124 pages, 24 illustrations, 85 lit. refs., 1964, Dfl. 20.00 (ca $5.50), ISBN 0-444.40610.7

2 - ELECTROMAGNETISM AND THE EARTH'S INTERIOR

by **T. Rikitake**

Contents: Preface. Introductory remarks. Main magnetic field of the earth. Theory of steady dynamo. Stability of the dipole field. Theory of non-steady dynamo. Geomagnetic secular variation. Theory of secular variation. Electromagnetic induction within the earth by daily variation. Theory of electromagnetic induction in a spherical body. Electromagnetic induction by various variations. Theory of electromagnetic induction in an earth having a plane surface. Theory of electromagnetic induction in a thin sheet of conductor. Theory of electromagnetic induction in a cylinder — two dimensional problems. Shielding effect of the mantle and secular variation. Over-all distribution of the electrical conductivity in the mantle. Electrical conductivity In the core. Possible effect of the ocean on geomagnetic variations. Earth-currents and magneto-tellurics. Conductivity anomaly in the crust and mantle.

xi + 308 pages, 31 tables, 159 illus., 310 lit. refs., 1966, Dfl. 65.00 (ca $18.00), ISBN 0-444.40480.5

3 - METHODS IN PALAEOMAGNETISM

edited by **D. W. Collinson, K. M. Creer** and **S. K. Runcorn**

Contents: Preface. List of contributors. Sampling techniques in the field. Measurement of natural remanent magnetization: 1. Astatic magnetometers. 2. Ballistic and spinner magnetometers. 3. Fluxgate magnetometers. 4. Principles of measurement. Procedures to test the stability of magnetization.
Presentation and analysis of data. Measurement of isotropic and anisotropic susceptibility. Magnetic measurements in strong fields. Techniques for the study of magnetic components in rocks. Miscellaneous laboratory facilities.

xviii + 609 pages, 39 tables, 327 illus., 1967, Dfl. 100.00 (ca $30.50), ISBN 0-444.40139.3

4 - MATHEMATICAL ASPECTS OF SEISMOLOGY

by **M. Båth**

Contents: Introduction; Contour integration and conformal transformation; Methods of stationary phase and of steepest descent; Series integration; Bessel functions; Legendre functions; The wave equation; Integral transforms; Matrix calculus; Calculus of variations; Integral equations; Lamb's problem; Wave propagation in liquid media; Influence of gravity on wave propagation.

xii + 415 pages, 10 tables, 99 illus., 1968, Dfl. 85.00 (ca $23.50), ISBN 0-444.40697.2
